

RADIAL TYPE ROOF FAN (0-10V With Pressure Sensor Assembly)

VKV-C SERIES

Technical details;

*Galvanised sheet steel support base *Verticle air outlet and galvanized rain cap.

*Backward-curved impeller. made of galvanised sheet steel.

*The fans are rated for exhaust ventilation and air conditioning systems for various premises that require reasonable energy saving solutions and controlled ventilation systems.

*With AC motors, provides significant savings in electricity consumption.

*Bird control grille. *Single-phase 230V-50Hz.

*These components are replaced by a maintenance-free electronic circuit board. AC motors are featured with high performance and well controllable speed range. Premium efficiency reaching 90 % is a define advantage of electronically commutated motors.

*Entegred pressure differentiated sensor provides automatic speed controller.
